Place: Call-In Only

Date: 02/05/2020 Time: 1:00PM - 2:00PM

Attendees: Kevin Coyne (DNR), Rowland Agbede (MDA), Marshall Stevenson (SHA/WBCM), Bill Fearrington (DHS), Kate Majchrzak (MDE), Lisa Lowe (DoIT), Gary Maragos (MDP), Conrad Schaefer (DoIT), Justin Mannion (DoIT), Darren Lloyd (DoIT), Matt Webb (Anne Arundel County), David Tomb (SHA).

Agenda

Introductions

Maryland Enterprise Software & MD iMAP 3.0 Update – Justin Mannion

- Darren Lloyd has recently joined the DoIT team, coming from working at the Port (MPA).
- FED UC Update: I had followed up a couple times with Anthony and Matt from ESRI about FED UC registration. They stated ESRI sent an email invite to everyone provided on the list. If an individual who was on your list had not received an email. Please let me know so I can work with Anthony and Matt.
- License Manager will need to have a patch applied. Currently scheduled for 02/14/2020 at 7:00 pm. The patch will be applied to the primary and secondary license managers. The change request has been submitted, awaiting approval. A notification has been sent. Directly emailed agencies who had licenses borrowed on the server. While the patches are being applied, users will not be able to utilized ESRI software that is pointed to our license managers.
- Lidar and Appdata Server upgrade to 10.7.1 is still pending. Conrad hoping to do those within the next 3 weeks or so.
- BGE Data Summit scheduled for February 26th at this time. BGE has sent invites to those on the list provided. If you would like to attend, please let me know so I can forward the invite.
- Data updates: the 2020 Qualified Census Tracts, Difficult Development Areas, Small Difficult Development Areas, Sustainable Communities.
- Lisa has been working on a Scope of Work for new DNR servers. Working with server team to develop specs to continue moving forward.
- Julia has submitted the1Spatial renewal.

ArcGIS Enterprise Installation Overview – Darren Lloyd, DoIT

- Darren had recently worked over at MPA, where he had gone through an Enterprise installation.
- Key Issues related to IT outside the scope of GIS. If you are going to do an installation, be prepared to work with your IT team to ensure proper ports were opened, firewall adjustments are made as necessary.

- You can set up portals identity store using active directory requires json setup with the proper credentials and parameters. Make sure to create a user profile that does not expire. Additional approval from management and IT was necessary since this is a security risk.
- Specific Use of dashboards after implementation.
- Installation of Enterprise is easy with the builder tool.

Subcommittee Updates

Training – Lisa Lowe

- Extension has been approved by the Board of Public Works. Hoping to get courses on the book in the next few weeks.

Centerlines – Marshall Stevenson

- Still investigating the use of the 1Spatial platform for centerline conflation.
- Still investigating with DoIT/ESRI to add a county identifier field for geocoding, especially related to road intersections to map crash data in a more precise manner.

Composite Locator – Lisa Lowe

- Currently in the process of another quarterly address point and centerline update.
- Still working with ESRI for solution to issue with composite locator. When doing a rematch with the locator while logged into AGOL and using ArcGIS Pro, it gives an error. Please contact Lisa and she can provide instructions for adding the composite locator from the REST endpoint.
- Lisa Lowe will check into how multi-family buildings are represented per question from Gary Maragos.

Imagery – Lisa Lowe

- Starting process to acquire western shore imagery.
- Still working through approval of flying for various restricted areas/air space.
- Negotiating possible 3-inch buy-ups for Baltimore City, Gaithersburg and Rockville.
- 2019 Eastern Shore imagery is almost loaded on the DoIT servers. The image service will be available sooner than the map service since it will take some time to cache all of the levels.

Lidar – Justin Mannion

- Update from ESRGC: Currently waiting on delivery of Howard County QL2 LiDAR for processing and hosting. There is a chance at collection of lower eastern shore this spring if paperwork and weather go smoothly.

Action Items & Additional Business

- DoIT scheduled to apply patch to license managers on 02/14/2020.
- DoIT will need to schedule 10.7.1 upgrade for Lidar and AppData Servers in near future.
